Product-focused engineer, 7+ years shipping software; remote and async. Leading Web Monetization at Interledger Foundation. Focused on accessibility, UX, and performance. Shipping faster with AI, carefully.

WORK EXPERIENCE

Interledger Foundation - Full-Stack Developer

May 2024 – Present

- Owner of the Web Monetization browser extension, the reference implementation of the spec
- Shape product roadmap for Web Monetization, and drive Open Payments with community input
- Collaborate cross-functionally with external engineers at Igalia on native browser support
- Build embeddable publisher tools and payment systems that use Open Payments
- Write technical articles about Web Monetization and act as an editor for the WICG specification

Monetized - Founding Engineer

Aug 2021 – May 2024

- Built a multi-tenant no-code membership platform for publishers, end-to-end
- Developed content editors in SvelteKit as a lightweight CMS with extensible, reusable post types
- Implemented sales dashboard and payments infrastructure: Stripe, creator payouts, Web3 support
- Managed GCP microservices; monitored errors and health with Sentry
- Instrument production events with Elasticsearch to debug issues and create insights

Grant for the Web - Technical Scholar

Aug 2020 – Apr 2021

- Built a native Web Monetization prototype in Firefox, shaping the WICG spec
- Picked up Gecko's C++ codebase to work across the core browser engine and the extensions API

Mozilla Open Source Support (MOSS) Program

May 2020 – Jul 2020

- Core maintainer of ReSpec, the publication system used to author W3C standards
- Shipped new features, performant APIs, improved CLI, overhauled the project's documentation

Chegg - Software Development Engineer Intern

Jan 2019 – Jul 2019

- Built UI for Chegg Prep and internal tools spanning ticket automation, LDAP, and API integrations
- Explored tooling to diagnose and automate handling of abusive Q&A content

Mozilla - Google Summer of Code

May 2018 – Aug 2018

- Developed new features in ReSpec, focused on UX, automation, and maintainability
- Implemented automatic cross-referencing capability, now extensively used by W3C specifications

EDUCATION

Masters in Computer Applications

University of Delhi 2016 – 2019

B.Sc. Physics (H)

University of Delhi 2013 – 2016

SKILLS

- **Web Development** TypeScript/JavaScript; Node.js Semantic HTML; CSS; React, Svelte
- **Programming Languages:** C++, Python, Rust
- **Cloud & Automation:** AWS, Google Cloud, Cloudflare, GitHub Actions, Docker
- **Databases:** SQL - PostgreSQL, SQLite; NoSQL - Firestore, Redis, Elasticsearch
- **APIs & SDKs:** REST, GraphQL, OpenAPI, WebSockets, CLI tooling
