WORK EXPERIENCE

Interledger Foundation - Full-Stack Developer

May 2024 – Present

- Own the browser extension for Web Monetization, the reference implementation
- Developed multiple algorithms for cross-currency micropayments
- Build publisher tools and payment systems that run on Open Payments
- Help give direction to Open Payments with new features and use-cases
- Support engineers at Igalia in bringing native support to Chromium
- Write technical articles about Web Monetization and act as an editor for the WICG specification

Monetized - Founding Engineer

Aug 2021 – May 2024

- Built monetized.link / keyosk.co, a multi-tenant no-code paywall platform for publishers, end-to-end
- Developed editor & dashboard interfaces in SvelteKit, with Firebase, Redis, and ElasticSearch on the backend
- Built payments infrastructure: Stripe purchases and creator payouts, plus Web3 support
- Managed GCP deployments with a microservices architecture

Grant for the Web - Technical Scholar

Aug 2020 – Apr 2021

- Built a native Web Monetization prototype in Firefox, shaping the WICG spec
- Worked across the core browser engine (Gecko) and the extensions API

Mozilla Open Source Support (MOSS) Program

May 2020 – Jul 2020

- Core maintainer of ReSpec, the publication system used to author W3C standards
- Shipped new features, overhauled the project's documentation, and contributed to specifications across multiple W3C working groups

Chegg - Software Development Engineer Internship

Jan 2019 – Jul 2019

- UI engineer for Chegg Prep (React, TypeScript, CSS-in-JS, Node.js)
- Improved CheggIndia.com's performance (3 times faster) and mobile responsiveness
- Built internal tools spanning UI design, ticket automation, and internal API integrations

Mozilla - Google Summer of Code Internship

May 2018 – Aug 2018

- Developed new features in ReSpec, focused on UX, automation, and maintainability

EDUCATION

Masters in Computer Applications

University of Delhi 2016 – 2019

B.Sc. Physics (H)

University of Delhi 2013 – 2016
